

ROLL-IT-UP 1

Ready to Roll.

The structured aluminum base of this classic display acts as a protective housing for your graphic panel so your image stays in perfect condition. The swivel kickstand adds stability but not bulk. All seven feet roll into the base for a flat package that fits neatly into a slim padded nylon carrying case. Robust construction coupled with portability helps this tool become the workhorse of retractable displays.

SPECIFICATIONS

The graphic panel rolls in and out of the unit.

Roll-it-up 1 can even be used at various heights. By simply extending the pole to only 1/3 or 2/3 of its full length, you can quickly create a presentation in stages or a table-top display.
